Promise To Start Action

By Tom Kerry

WASHINGTON, April 8-An estimated 7,000 delegates packed the National Guard Armory here today at the AFL-CIO Unemployment Conference called to initiate a movement to "Get America Back to Work." It was the first timid step taken on a national scale by the AFL-CIO tops to provide union leadership to the struggle for adequate unemployment compensation and jobs.

Recognition of the historic importance of the gathering was implicit in the extensive press, radio and television coverage. Attendance was severely restricted by the AFL-CIO heads. Only 15 cities in the east and midwest were invited to participate. Quotas were fixed for each union. Admittance was confined to those carrying official credentials issued by the national AFL-CIO.

As a result less than onethird were actually unemploy-ed. Most of the former AFL craft union delegations were a 1 m ost exclusively officials, stewards, etc. The biggest contingents of unemployed came from the mass production industries, auto providing the largest. An estimated 1,000 arrived without "official" credentials. Such protest followed refusal to admit them, that they

MARCH 29 - Berkeley, just across the bay from here, is ordinarily a tranquil community of some 140,000 people whose own doings are shadowed by activities on the giant campus of the University of California. The city elections that come and go stimulate little interest. Not since the ear of Eugene V. Debs when a local socialist became mayor has there been anything like a meaningful political contest. Until the present election that is.

This campaign was transformed overnight through the vigorous initiative of the local socialist coalition known as United Socialist Action. Organized several months ago on a Bay Area basis the Berkeley election was the first opportunity it had to demonstrate its footwork.

Challenging the nonofficial but nevertheless very real ghetto boundaries profitably maintained by the Berkeley Real Estate Board against the city's large (25%) non-Caucasian minority, the USA sponsored a bill modeled on New York's Isaacs-Sharkey-Brown housing ordinance. The bill would make it a crime to refuse to rent or sell housing accommodations to anyone because of race or national origin with cost of legal proceedings to be paid by the city. And the USA entered its candidate for the Council, Marion Syrek, a printing tradesman, to give the Democratic and Republican contenders a run for their money on this

That the USA had touched a very sensitive nerve became immediately evident. The Real Estate Board and Democratic and Republican politicians reacted explosively, A white Berkeley Citizens Council collected a war chest and bought space in the local paper and on local billboards, seeking to arouse prejudice and fear among the voters.

Berkeley has long enjoyed a reputation for cosmopolitanism and liberalism. The various liberal and radical currents are well represented. The initiative of the USA was welcomed by some of these, condemned by others, and the campaign became the center of a controversy that reached into every corner of Berkeley's political life as well as other parts of the Bay Area.

The arguments of the liberal and radical opponents of the USA-sponsored measure range all the way from the legal quibbles of the NAACP regional office to claims that the bill doesn't go far enough and that therefore radicals should abstain until something comes along that meets their standard of approval.

Actually however the debate over the measure reflects two opposed conceptions of how the minority and labor movement should conduct the fight for their needs and aims.

Among those rank and file voters who are keenly aware of the humiliating pattern of discrimination there is no doubt as to what to do. They welcome an organized attempt to curb this evil and scorn the argument of the NAACP lawyers and others who counsel patience while the world waits for progressive legislation out of Washington and Sacramento. The wait has been long. Not until the USA made its challenge was the issue even publicly acknowledged in Berkeley. Virtually every NAACP activist encountered during this fight has declared himself for the measure in defiance of the NAACP leadership.

The Communist Party made its opposition clear through its newspaper, the People's World, and the activity of its shadowy front group known as the Independent Voters of California. But they ran into trouble here. A freewheeling apparatus purporting to speak for

The USA campaign story got front-page treatment in the local capitalist press and ation of Tibet, development of coverage in the local Negro labor and college new industries, social reform press. The People's World ignored the news measures - these precipitated until the racist campaigners attempted to as- the two-year-old rebellion, the sociate the paper with the USA. This brought most recent phase of which an immediate rejoinder from the editors, who was marked by fighting in Titried to distinguish their opposition from what bet's capital, Lhasa, and the they called the "out and out opposition" of flight to India of Tibet's suthe racists.

The attitude of the Socialist Party -Social Democratic Federation was mixed. The talist press discount the charge new Shachtmanite recruits reacted much as of "forced communization." Thus did the Stalinist leadership. They, too, cited Tillman Durdin; best informed the "danger" to progressive legislation. How- of the New York Times' staff ever other members of the SP-SDF were un- of Far Eastern correspondents, responsive to this argument and saw in the writes on April 5 that "... no issue an opportunity to put some meaning into revolutionary social or political their own election campaign. Their candidate gave forthright support to the measure. In re- creed since 1956. But the steady turn the USA offered him conditional support in the race. The USA also sought by this to fluence of the ruling ecclesiastiindicate that it would back any socialist willing cal elite has, nevertheless, had to enter an electoral contest on at least a minimum socialist platform against candidates of the capitalist parties.

In contrast to the pulling and hauling and dismay shown by their liberal and radical elders, a very active student organization known as "Slate" responded with admirable directness. They dismissed the superficial arguments against Proposition "C" and joined the fight to make it law. But no sooner did they start to work than they ran into opposition and hostility from the University administration. This centered in the office of the Dean of Students. Dean Stone, a candidate for the Berkeley City Council, issued an edict that student organizations could not become involved in issues outside the campus. "Do As I Say, Not As I Do" was the motto of this aspirant for office.

This started a new controversy overshadowing the anti-discrimination issue. Slate now has a first-class fight on its hands. At stake is its continued existence as a recognized student organization. I dare say that upon the next ceremonial occasion when Dean Stone utters those banalities deploring the conformism and silence of this generation he will be met with a Berkeley version of the Bronx cheer.

All in all the campaign in Berkeley has offered instructive lessons in capitalist politics and the behavior of liberal capitalist politicians. Come to think of it the fight is the most lively and significant course in political science that this university town has had in a long time even though it is not listed in the university catalogue and the only credit given is not recognized by the professors.

I would say that the most instructive item was the behavior of the white liberal political leaders who have expressed themselves in the past with deep passion and conviction on the outrageous conduct of Gov. Faubus and the outrageous color bar in South Africa. They give generously, I am sure, to NAACP and Urban League financial drives. Their convictions get stronger in direct ratio to the distance of the issue from their immediate material interests and concerns.

Another instructive bit was the wriggling of radicals influenced by the CP and the SP-SDF line. The thought of having to take a public stand at variance with the strategy of the NAACP and the so called "friends" of labor and minorities in the capitol brought

Tibet's Feudal Rulers Rebel Against China

By Daniel Roberts

The uprising in Tibet against Chinese suzerainty is the revolt of a feudal ruling class against social change. Chinese colonizapreme ruler, the Dalai Lama.

They can dress it up any bates. They do no work. Their ence, since the main oppressor ficial policy as follows: "Be- betan hands, although the Chin-

onduct since he reached India, however, indicates that the CCP's account is true. He is seeking asylum there, although according to an April 7 Reuters dispatch Premier Nehru "will discuss with him the possibility of a return to Tibet." (While Nehru is not averse to using the Tibet issue against the Indian Communist Party, he does not want to jeopardize India's treaty of friendship with Peking over the matter.)

The fact that the Chinese were forced to fight off a feudal rebellion before the class antagonisms in Tibetan society could explode the old order from within has given every reactionary in Asia, including, of course, Chiang Kai-shek, a field day for anti-Communist agitation. Those who are hotting it up most are religious leadersespecially among the Buddhist monks in Burma-who have a long record of stirring up what is known in Asia as "communalist" riots (pitting one religious or national grouping against another.) The New York Times in an April 5 editorial advises Washington that political mileage might be made by now posing as the champion of Buddhism in Asia.

That won't solve any of the problems of the Asian masses, however. And despite confusion over the issue of Tibet, the working people throughout Asia will still base themselves on the experiences of the Chinese people. These prove that only through socialist revolution can the Asian people free themselves from imperialist exploitation and begin climbing out of age-old economic backwardness.

Logic of Marxism

Originally a series of lectures, this mimeographed book of 75 pages by William F. Warde is an introduction to the dialectical method. Students of Marxism will find it useful in gaining a better appreciation of the way such figures as Lenin and Trotsky approached the great problems of our time.

The Irregular Movement of History

In this 52-page pamphlet, William F. Warde explains the Marxist law of uneven and combined development of history. Well chosen illustrations show how this law can help clarify some of the most puzzling social and political problems of the day. 25 cents

War in 90 Minutes

In 90 minutes World War III may begin. It may be started by Gen. Thomas S. Powers. Never heard of him? We've got news for you. You may NEVER hear of him. You may be one of the first victims in a nuclear contest you didn't even know had started.

This information is not a faptasy out of science fiction. It happens to be reality. Gen. Thomas S. Powers himself told a House Appropriations subcommittee in February that the power to plunge America into World War III rests in the hands of two men. He is one of them. The golf-playing President is the other.

The congressmen, who abdicated their power to declare war when Truman took America into the Korean conflict, listened like sheep as the general described how he can send his entire fleet, loaded with H-bombs, streaking toward previously selected targets. They did not even gulp as they heard this possible executioner of the human race say that after the fleet is on its way the golf-playing President has 90 minutes to decide if the fleet should continue toward its destination - or if it should return home.

"I can launch this force if there is an emergency. Nobody but the people in the SAC would know I sent it out . . . This gives the civilian decision-making machinery a gift of . . . at least an hour and a half . . . to make its decision."

That was what Gen. Powers said. That was what the congressmen heard. That was the testimony - highly censored naturally - which the press reported April 6.

The general, who can throw America into an intercontinental H-bomb contest 90 minutes after he finishes his coffee, assured the committee that there was no need for them to worry. If he sends his bomb-laden planes out, all will return to their bases after a stipulated time - "unless they get an additional instruction from me, which is passed on in a secure, foolproof and safe way." The additional instructions don't go out unless the President gives his approval. It's like a check that requires a counter-signature before the bank will cash it.

As chief of the Strategic Air Command, Gen. Powers can, of course, order the fleet on its way any time a possible "attack" warning is flashed on an intricate system of radar screens.

Sometimes a radar screen "sees" things that really aren't there, the General conceded. But "you must assume" that what it detects is real "and act accordingly."

Suppose it takes not 90 but 91 minutes to discover that what the screen "sees" is only a squadron of geese? Or static in an electrical component? The General didn't say

The Ruling on Double Jeopardy

Since the period of McCarthyism, liberals — and some radicals, too — have felt that the Supreme Court is genuinely concerned about upholding constitutional rights. The 1954 school desegregation decision and a number of pro-civil liberties rulings since then are seen as cases in point.

Those holding this view will generally concede that the high court has been less than forthright even in its favorable stands. It failed, for instance, to implement effectively the desegregation decision. Its civil liberties rulings have been based on technicalities that skirt the basic constitutional issues involved.

The court now appears to have inverted its mood. The hesitation about defending constitutional rights have been reflected in important majority decisions. Two of these involve restrictions on the safeguards provided by the Bill of Rights.

25: "After a state prosecution there should be no federal prosecution for the same act or acts unless the reasons are compelling."

ernment does engage in double- jeopardy prosecutions it will be for "compelling" reasons.

A sober appraisal of what the ruling means was given by Justice Hugo L. Black in his strongly worded dissent. The decisions, he said, "cause me to fear that in an important number of cases it can and it will - happen here despite the Bill ing class base and a socialist adequate indemnification." of Rights."

Black added: "Inevitably, the victims of such prosecutions will be the poor and the weak in our society, individuals with- dictory class pressures at home from a high of close to seven demonstrated by a sticker camout friends in high places who can in-

radar screen are real.

It can be assumed that when the gov-

dencies.

The first came last November when the court upheld the most obvious kind of subterfuge for circumventing the school desegregation decisions - the Alabama school placement law. Then on March 30, the court struck a cruel blow at the Bill of Rights by ruling that a person can be prosecuted twice for the same offense. The court's stand is a flat contradiction to the Fifth Amendment which states: "... nor shall any person be subject for the same offense to be twice put in jeopardy of life and limb . . ."

Hoping to allay public apprehension about this reactionary ruling, Attorney General William P. Rogers asserted April

make scapegoats of helpless, political, re- tionary process that is driving throat because it can arbitrarily celona and other cities. Groups ligious or radical minorities and those who his government far beyond the either maintain or relax its lim- such as this, which formerly Soviet Sale of Wheat differ, who do not conform, and who resist tyranny."

Six of the nine justices voted for the double-jeopardy decisions. How fundamentally the minority of the court may differ from the majority on this question is debatable. But they proved incapable of stopping the six reactionaries. It should now be quite plain that the defense of the Bill of Rights lies with those who have the major stake in its preservation - the organized movements of the working class and the Negro people.

The Case for Federal Standards

An effective case for uniform federal unemployment compensation standards is made in the March issue of Labor's Economic Outlook, published by the AFL-CIO.

The publication points out that under varying state regulations the standards have deteriorated badly since the program started. Most states began paying unemployment compensation in 1938 and 1939. Originally it was not thought of as a relief handout but as recognition of the right of a jobless worker to a fixed portion of the wages he should be making.

Since then jobless payments have lagged far behind both prices and wages and employers now argue that benefit increases should only reflect higher prices - that a 1959 compensation check should not buy any more than a 1939 one did.

The Economic Review replies: "But a standard of living appropriate today: medical care, housing and transportation that once were luxuries are now necessities. Getting a layoff slip should not mean a transfer to the 1930's."

Big business, through control of the two major parties, has prevented unemployment compensation from keeping up with the times. In 1958, jobless pay made up for less than one-fourth of wages lost. The typical maximum benefit was 44% of the weekly wage as compared to 65% in 1939. At that time 35 states provided compensation equal to 60% or more of average pay. Today there isn't a single state in that bracket. Twenty years ago only one state in the union paid less than 49% of the average weekly wage. Last year 44 states were paying under that amount.

The duration of payments has also periods of unemployment. In 1958, two bad revolutionist." The Times and Cubans." out of five jobless - a total of three mil- said, "Dr. Castro angrily delion - exhausted their benefits before clared that Cuba would be neugetting back to work.

Jobless Statistics

In Great Depression

Editor:

The article on the history of the 30-hour week bill in the sion?" he asked. "Was it the April 6 Militant cited a figure freedom of people to grub in of 20 million jobless in 1933 and 12 million in 1935. This would give the impression that the Roosevelt administration had cut unemployment by 40% in

these two years. The figure of 20 million unemployed for 1933 is, I believe,

inaccurate, although the writer of the article may have cited figures used in the heat of senatorial debate at that time. The official figures from reliable sources which I have been able to check are as follows: U.S. Bureau of Labor Statistics, an average of 12,634,000 unemployed during 1933; the AFL, 13,271,000. According to a later study by the CIO, the number

for 1933 was 12,643,000. All three sources give the number of unemployed in 1935 small revolution to win union doing well now and even Stal- Morris Ernst, once a leading as between ten and eleven recognition from this billionmillion. aire.

"That's the Law" - By Lillian Kiezel

from extended unemployment benefits workers

"That's the law!" This cruel phrase was heard by thousands of New York jobless last week. Employment office clerks could say little else to those who argued: "Why me?" or "Why am I being penalized?" when they were told that they were not eligible for 13 additional weeks unemployment benefits under the new state law.

In hard-hit Buffalo, where 12% of the work force is unemployed, hundreds came to collect checks that weren't there.

John T. Chester, 45-year-old production control clerk at Buffalo's Bell Aircraft plant, got his twenty-sixth and last regular state check. A. H. Raskin of the N.Y. Times said that Chester "protested loudly when he learned that he could not get a nickel under the extended program."

William Bursee, a 31-year-old steamfitter and veteran of World War II signed for his eighth emergency check. He was "staggered when the clerk told him he would not get the five more checks he would have received under the Federal law."

Another example is Mrs. Morris Cohn, a food administrator, who would have received her regular check last week instead of this

Notes in the News

ployed.

WORK-DAYS LOST IN 1958 - The AFL-CIO estimates that of the four major causes of lost work-days last year, strikes caused 23 million; work accidents, 55 million; illness and injury, 544 million; and unemployment, 1,118 million. Employers and their spokesmen like to harp on what strikes cost the country in lost production, but from these figures it is clear that in 1958 unemployment cost more than 48 times as much as strikes. . . .

SEGREGATED BLOOD - Gov. Faubus of Arkansas signed a law April 4 requiring blood from Negro donors to be labeled as such. He said there was a chance white persons would get diseased Negro blood in transfusions. He said nothing about a law requiring antitoxins from horse's blood and vaccines from calf's blood and monkey's blood to be labeled as such, or hormones and other extracts from stockyard animals - probably because there is no risk of mismatching these in types like the Governor. 2 10 9

STUDENTS DEMONSTRATE LEARNING - Efforts of banks to recruit cheap student labor have not been cheered at Harvard. When notices were posted on a bulletin board listing part-time jobs at \$1 an hour, the students scribbled, "Absurd," "Nonsense."

WILL U.S. RISK PING PONG IN PE-KING? - When a reporter asked whether passports would be issued to Americans wishing to participate in the next world championship ping pong matches at Peking in 1961, Lincoln White, State Department press chief, replied: "The question does not now arise. We received no applications for passports." In view of the gravity of the matter, White added that his answer should not be interpreted as indicating any change in the policy of prohibiting travel by United States citizens to the People's Republic of China.

GARAGE PAYS OFF - Rep. Iris Faircloth Blitch, Democratic Congresswoman from Georgia, doesn't have a front porch like Randall S. Harmon, Democrat of Indiana, which she can rent to the government, but she does have a garage. She equipped it with wood panelling, red drapes and a fireplace. As landlord this entitles her, in line with congressional privileges, to collect \$100 a month from the U.S. Treasury for this convenient office space in her driveway.

NO NUCLEAR COVERAGE - European insurance companies are protecting themselves from the threat of nuclear war. In house insurance policies they now include the following paragraph: "Excluded from the guarantees against damage are those (disasters) due to effects direct or indirect of explosions, of heat

or radiations coming from a transmutation of ternational workers holiday, it the nucleus and/or radioactivity. . ." Countries where insurance companies have in this way class struggle against capitalist banned nuclear war include Austria, Belgium, Denmark, Finland, France, West Germany, Norway, Luxembourg, Sweden, and Switzer- millions of workers in all capitland.
