"We are going to have the fight of our lives here now until election, and we have every reason to believe the victory will be ours when the ballots are finally counted." C. E. PROSSER, Secretary Campaign Committee, Los Angeles, Calif., in letter commenting upon the Army's work in helping win the seed.

You can help carry California for Socialism by forwarding your contribution to send the APPEAL to non-Socialist voters until after election. Fifty cents will pay for one sub, and more than likely make a Socialist of the reader.

LEMON IS DEFIANT

While the APPEAL has been vindicated by the committee investigating conditions at Leavenworth and while this committee recommended the immediate dismissal of Frank H. Lemon, deputy warden, and a number of others connected with the institution, the case is not yet at an end. Lemon, the APPEAL is informed, has employed counsel and purposes to fight the matter in a class court to see if he cannot retain his position.

As he appeals to the court instead of yielding to the recommendation of the investigating committee which examined the charges against him, further appeal to the court should be made. The APPEAL calls upon Harry Bone, prosecutor in the federal court of Kansas, to procure at once the indictment of Frank H. Lemon for the murder of Clarence Maitland on the 24th of May, 1907. It does not matter that appeal would have to be made to a circuit court instead of the federal court. It remains the duty of Bone to secure his indictment. Unless he does so he practically sanctions the abuses in the federal prison, for he represents in Kansas the institution that supports this prison.

CHANGE OF NAME.

Do you not think that if the name of your party was changed to some other word it would be better and easier to get our votes?—A New Convert.

Every effort of the people to get any relief from the exploitation of their masters has been met with ridicule, and they have been laughed out of countenance. Socialism would meet the same treatment it does no matter under what name it might herald its coming. When labor first attempted to organize in this country it was met with the epithets of free love, anarchism, traitors and enemies of public order, and hundreds of its members were imprisoned and others fined heavily. When the labor unions demanded that free schools be established and paid for out of the public funds, the proposal was met with the most bitter denunciation by the property owners as confiscation, highway robbery and other love names. No the name Socialist party is not a handicap; it is winning its way everywhere. In France four parties have the name Socialist attached to their names just to fool the people. It will be so in this country in a few years. It will be as popular here as it is popular now. Our time is coming, and the name is not a drawback at all. We are proud of the word that is making exploiters tremble in every country on earth.

The soldier is a scab. He keeps the working class, of which he is a member, down by shooting it into submission for the masters.

Following California's Lead

Capitalism is corner-stoned in robbery and murder. Without these it could not stand. But it would not do to have the people know this and so robbery is called "business" and murder "patriotism."

Capitalism rests primarily upon the robbery of the working class of what it produces, and its power is buttressed by its courts, backed by its army, glorified by its press and sanctified by its pulpit.

Capitalism is essentially a system of force and murder and the tragedy lies in the fact that it is always the working class that furnishes the force that keeps the working class in subjection, and always the working class that murders itself.

And this always in the name of patriotism!

This word cloaks so much hypocrisy, deceit, rascality and false pretense that it has come to be despised by every honest and intelligent human being.

Patriotism is always invoked when preparation is being made to commit murder on a large scale. Even the children in our public schools are polluted in this unholy traffic and are taught to sing of "patriotism" for the glory of "our country," to which Morgan and Rockefeller will soon have a clear title.

Nothing could be more criminal, more beastly, than to train the young in the art of murder. And yet that is precisely what the ruling class is doing in our public schools and with scarcely a protest from the people. Only a day or two ago the following press dispatch came out of Washington:

"Assistant Secretary of War Oliver is endeavoring to enlist the aid of the governors of the several states in developing the military training of the pupils in the high schools of the country. Today he dispatched an identical letter to the governors, inviting their attention to the enactment by the California legislature of a law providing for the organization of companies and battalions of high school boys who are to be armed with Krag rifles and trained by competent instructors detailed from the regular army. In his letter General Oliver makes a strong plea for such state legislation."

This is the educational program of Morganized capitalism and if the people could only think clearly about it

WHEN the working class exercises its political power, represented by the franchise, conspiracies against workers will cease.

The failure of a bank in England has led to a general agitation for banks owned and controlled by the government, instead of private banks called "national." The same thing in America would stop bank failures here.

A BLACKLISTED telegrapher tells in this week's *Coming Nation* of how, after being driven all over the country in the pursuit of work, he at last tried to get "back to the land." His experience shows that there is no escape for the worker inside of capitalism.

THE APPEAL has several applications of Socialist teachers seeking schools. Unless some school board will ask their services, other applicants will please refrain from sending in their names, as the time for employing teachers is pretty nearly over.

The committee investigating the federal prison at Leavenworth recommends the immediate dismissal of Lemon and others of the more corrupt and cruel in management of the prison. This will not secure justice for the working class (for prisoners exist for them alone—and for deserting soldiers), but it will make those at the head of other prisons a bit more humane for some time to come.

In the investigation of the sugar trust Claus Augustus Speckles, son of the head of the refining company which opposed the trust most strenuously, testified that in an effort to deter his father agents of the trust put sand in his machinery and dead rats in his barrels of sugar. It was methods of this kind that the opposing interests were induced to yield to the trust. Holding-up individuals at the muzzle of a revolver is mild in comparison to methods of this nature.

The Milwaukee health department is the first one in this country to attack the problem of health from the point of view that poverty and disease go hand in hand. In the current number of the *Coming Nation* Carl D. Thompson, city treasurer of Milwaukee, describes the work of the Socialist health department. He tells how they have been met with injunctions and suits and every possible means on the part of those who are profiting by disease and yet, how, in spite of this, the Socialists have been able to accomplish much.

The *New Northwest Record*, published at Philadelphia, in commenting on the effort of Uncle Sam to reclaim 30,000,000 acres of arid land in the west, says that it would make room for at least 2,000,000 families and that each family would "pay the railroads alone \$500 a year for what they ship in or out, or a total of \$1,000,000,000 a year." You may depend on it that under capitalism the interests are looking out more for the opportunity to fleece the workers than to give them the opportunity to secure farms for the workers means only that the farmers will produce enough to enable the interests to make more money. Think of figuring in advance of exploiting every family \$500 a year in transportation alone!

SHOAF SEES THEIR DANGER

Writes Privately That Quick Action is Needed to Save the McNamara Brothers

BY GEORGE H. SHOAF
 Staff Correspondent of the APPEAL.

Something ought to be said or done by somebody to arouse the working class to a sense of the peril in which the McNamara brothers this moment are placed. If anything is said or done it ought to be said or done quickly, for if the prosecution continues unchallenged the methods they have used in this case from the beginning, the officers of the iron workers' union will be pushed through a speedy trial to certain conviction, and before the American people are aware the bodies of these prosecuted representatives of organized labor will be swinging from gibbets' mute testimonials to the power of triumphant plutocracy.

Neither of the McNamara brothers appear to realize the gravity of their position. They know they are innocent of crime and that knowledge impresses them with the hope of liberty, which they think will be theirs upon the conclusion of their trial.

Their attorneys, while cognizant of the seriousness of the situation, are

hopeful of justice and seem possessed of the idea that even Judge Bordwell's court will not dare sanction the execution of murder.

If Burns' detectives know what they are talking about, and if the Merchants and Manufacturers' association means what it says, regardless of the efforts of the defense attorneys, the McNamara brothers have about as good a chance of acquittal as Harrison Gray Otis of earning the love and respect of the working class. The prosecution is working with a confidence apparently born of knowledge. The defense is trying to pierce the prosecution's frame-up while studying the features of the case. So far the prosecution smiles in the lead because of the advantage of an early start. If the issue is left to a decision in Judge Bordwell's court, no matter how flimsy may be the evidence produced by the prosecution or how brilliant may be the oratory poured out by the defense, John J. McNamara and his brother might as well now begin to prepare their necks for the noose. I have watched all the proceedings closely since coming to Los Angeles and it is impossible to express my indignation in words. As Debs would say, "The arrest and imprisonment of these labor men constitute a burning shame and a damning disgrace." If the McNamara brothers should be in jail, then should every class conscious workman in the United States be in jail."

Personally I think every workman who remains silent in the presence of this outrage is a coward whose proper place is in chains and slavery.

According to several of the defense's attorneys this will be the last case in which they will engage, the termination of the McNamara trial will signalize their retirement from the practice of law.

It is expected that the wage slaves in this country will raise seven hundred and fifty thousand dollars to be used in financing the defense. This amount will be pitted against the millions commanded by the steel trust. Again I want to impress the fact that unless something more to the point than raising money to give to lawyers is said or done, the McNamara are in a bad way. If you are going to speak, do it in circulating the Rescue Edition. If you are going to do anything make it a heroic effort to carry California for Socialism and secure a working class judge to try the case. That alone will count.

Judge After the Appeal

Los Angeles Tribune, July 22

Judge Walter Bordwell protested against articles in a Socialist newspaper of national circulation attacking him and his rulings in the case. He has asked the attorneys for the defense to use their influence in an effort to have the attacks discontinued. The attorneys have promised the judge they will do what they can.

One Hoss Philosophy

BY J. A. WAYLAND

The rich inveigh against anarchy and continually practice it.

A fly is a great speculator, and about as useless as the other kind.

Nothing is unconstitutional that robs the labor of the country for the benefit of the corporations.

The man who is opposed to making women equal before the laws with men, must have a very poor opinion of his wife and daughters.

Landlordism is more rampant and unbridled in America than in Europe. Poor, deluded American. He don't know landlordism when he sees it.

The millionaires in congress are just dying to enact laws to protect the people against the rapacity of the monopolies, trusts and combines in which the said law makers own stocks and bonds! You day laborer, do you catch on?

The mass of mankind work so hard and faithfully for the poorest kind of an uncertain living, when a few hours' earnest reading would show them how they and their children might be rich. And so blinded are they by the press of the rich that they will only read the things the press that upholds this system prepares for them.

The surface of the earth is fast being concentrated in a few families, and all the other people and all to be hereafter will have to pay tribute or tax to these people for the privilege of living on the earth. This is being done by and through the ignorance of the mass of people regarding money and the effects of monetary laws.

Jay Gould was known as the wrecker. He would first wreck a road and then when he got it "into his net" he would buy it in. He made a hundred million by it in a few years. Do you think any persons have had a hand in wrecking this country so they could buy in its property for a song? Think over it, brother Jonathan. It means much to you and your babies.

I never read of a king who was enamored of a person who questioned his divine right to rule and tax the people. The same is true today of the bankers, railroad kings, coal barons, sugar lords, and so on ad libitum. All exist for the same reason—to plunder the people, and are permitted to exist for the same reason—the ignorance of the people.

Labor organizes, strikes, fights and starves in its struggle against employers, and continues to vote to have employers instead of voting to own the plants themselves. Collective ownership would deprive grasping employers, as the workers are a majority of the public and they would not cut their own wages. But they vote to cut wages and be turned out without work when they vote for private ownership.

Did you ever stop to think why some men are wise—philosophers—while the mass of mankind is dull? It is not much reading that makes the difference for many people are greater readers than philosophers. It is what they read. Had a philosopher spent his hours in reading novels or the papers of the day he'd never be wise. It's a hint for those who would have the pleasure and power of knowledge. Read the works that wise men read.

DOING LITTLE THINGS.

Most people never do anything because they are waiting an opportunity to do something great all at once. And opportunities of that kind never come to people of that mind. Suppose Judge Lindsey, the world-famous kid judge of Denver, had waited until he could have electrified the world by some act; he would never have been heard of and the courts would never have been so greatly changed in their attitude toward the young waywards. But he did what little things he saw next to him—and he kept on doing them, and lo! he woke up famous. And he is deserving the fame. "You sow an act and you reap a habit; sow a habit, and reap a character; sow a character and reap a destiny." You need only to convert that neighbor of yours—and if you cannot do this it is because you are in need of further development yourself. Get down to the things right about you, as did Lindsey, and in a few years you will have developed an ability and have done a work that will make your life worth while. There is plenty to do, and no place better than just where you are at. Don't think that your neighbors are worse cases than people anywhere else. They are not. People are much the same the world over. The fault lies more with you than with them. Do the work in your own neighborhood, and the world will grow better and brighter.

PROSPEROUS TIMES.

The wages of men employed are being reduced. Times are awfully prosperous.

The faces of parents are sad and careworn. Times are awfully prosperous.

The people are robbed and have no redress. Times are awfully prosperous.

Millionaires have money and slaves. Times are awfully prosperous.

The law and officials are owned by the plutocrats. Times are awfully prosperous.

Moral: If you want to keep the times prosperous vote either one of the old tickets. If you vote the Socialist ticket, they will change all this and ruin the country.

W. R. SHEER calls the unemployed "the army of despair." The name is apt and it is the most dangerous army that capitalism ever created.

Warning from McNamara

McNamara from Jail Endorses Carry California for Socialism Movement.

I deem it wise to warn our readers to take lots of salt with the ordinary newspaper reports coming from Los Angeles from this time on, as far as the cases are concerned. They are highly colored. Depend upon official reports and the Socialist press. At the same time Milwaukee, your own town.

SEIZES THE EVIDENCE

By telegraph to APPEAL TO REASON.
 Erie, Pa., July 27, 1911.—Gilbert B. Perkins, head of Perkins Detective Agency, who is on trial with Chas. Fankly, Philadelphia manager, on charges of sending black-hand letters to Chas. H. Strong, tonight charged the Burns Detective Agency with trying to get him out of the way so they could walk John J. McNamara of the Structural Iron Workers' union to the gallows. "When our offices were raided at the time of my arrest," said Perkins, "only the papers containing the names of McNamara and the Strong cases were seized. The McNamara papers have never been returned. I believe the postal authorities were duped by a shrewd criminal, though possibly some of them were concerned in this giant conspiracy to get me out of the way in order to make certain I could not aid McNamara. We had eliminated McNamara by our work on the case for Caldwell and Drake of Columbus, Ind. McNamara never had any thing to do with the dynamiting. We will prove him innocent, for we have been working steadily upon this matter for nearly two years."

CONSPIRING WITH IMBECILES

Three labor leaders were recently indicted in Chicago for complicity in the murder of Vincent Altman. The case was worked up by the Burns Detective Agency and in many respects shows the finger marks of that criminal institution. It was shown that Pardee, on whom the state depended for conviction because of his confession, was an ex-convict and had once been in an insane asylum. As a consequence the indictments against the three labor men have been quashed and there is a prospect that the city attorney who brought the indictments will be compelled to resign.

There is a similarity between this case and that of the McNamaras. Both cases were worked up by Burns' men. In both there was an alleged confession. Now the claim is made on the strength of relatives' knowledge that McNamara, on whom they rely to convict McNamara, is weak minded, just as Pardee, whose evidence was expected to convict the Chicago men, was insane.

If we are to be ruled by detective agencies who employ insane men for the purpose of hanging innocent men, then surely things are in a desperate condition. It is time for laboring people to arouse to the seriousness of the situation.

FORTIFIED GRANTS.

The United States has filed suit against the Oregon and California railroad company at Portland, Ore., for forfeiture of a portion of a grant made to that road in 1869.

The grant provides "that the lands granted by the act aforesaid shall be sold to actual settlers only, in quantities not greater than one quarter section to one purchaser and for a price not exceeding \$2.50 an acre." More than two and a fourth million acres of this land located in the state of Oregon are still unsold, and the company, now one with the Southern Pacific company, is offering part of it at a price much advanced over that provided by law. As a result the grant should be forfeited, and suit has been brought accordingly.

It must be remembered, however, that though Oregon has radical labor laws, the suit is before a federal judge and will go before the supreme court of the United States before it is definitely decided. Under these conditions it is not likely that the people will get that which really belongs to them.

SOCIALISM is becoming so general the world over, the "timid" capitalist will find it hard to get a refuge from the agitator.

Rescue Edition No. 2

In a letter to the Bridgeman's Magazine, official organ of the union of which he is secretary-treasurer, John J. McNamara says:

"I deem it wise to warn our readers to take lots of salt with the ordinary newspaper reports, as far as our cases are concerned. Depend upon official reports and the Socialist press."

To the best of my knowledge McNamara is not a Socialist. But the preliminary work of the Appeal and other Socialist publications has proved to him that in ANY contingency, where labor is made the victim of the master class, the Socialist party and press may be counted upon. We must make this apparent. The Army-freed Moyer, Haywood and Pettibone. But they were avowed Socialists. Now the Army rallies to the support of two other trade union victims of a capitalist conspiracy, NOT BECAUSE THEY ARE SOCIALISTS, BUT BECAUSE THEY ARE MEMBERS OF THE WORKING CLASS. On September 4, 1911, the Socialist party can teach this lesson of class solidarity more effectively than ever before in its history.

The time and issue are great enough for YOU to lay aside every other consideration and lend a hand in distributing Rescue Edition No. 2 on Labor Day. The party, the movement, the press are counting upon YOU.

Socialists at Work

The Socialist party is wonderfully prolific in the matter of initiating motions for referendum to the party.

As the movement grows in power it develops a tendency to localize, due to the fact that the capture of political power is imminent in many sections of the country.

We are entering upon a great national campaign. We should bend our energies to the increase of our party membership and consequently our party dues.

All Milwaukee has been shocked by the exposure which Health Commissioner Kraft has been making of the horrible conditions of the city's candy factories.

This is the man that the doctors of Milwaukee tried to put out of office. The health department has issued drastic orders to the factories requiring screening of windows.

It has often been asked: "What can a Socialist do, if elected?" And if the question means, what legislation can he get while in the minority.

Summer W. Rose, way down on the gulf coast in the city council of Biloxi, Miss., has now been seven months a Socialist officer.

The executive power shall be vested in a president of my United States of America. He shall hold his office, under my direction, during the term of four years.

Section 1. The judicial power of my United States in one supreme court of the slickest lawyers in my employ, and also in such inferior courts as I shall find need of and direct congress from time to time to establish.

Earnings of the steel trust were greatly increased the first quarter after it had been exposed and prosecuted and generally reduced to pulp.

EUGENE WOOD continues his discussion of the difference between work and play. In this week's Cowing News, he discusses this subject in a striking and laughable manner.

You can't present a convincing argument without proof to clinch it. This is the Arrow's long suit. It presents the undeniable proof for thousands of statements which may be challenged by your opponents.

Philosophy and Fable

I want you to know that the roof of the night is beginning to glow with a growing light.

There is nothing inevitable that is not past. I am glad I am not rich. I am mean enough already.

The workers will be a great day when the workers won't. Capitalists want the workers to use their hands, Socialists, their heads.

There is one army, more dangerous than all others, which the capitalists can recruit at will. That is the Army of the Unemployed.

The power to declare acts of congress unconstitutional was usurped on behalf of the supreme court by Chief Justice John Marshall, who, in order to read into the constitution his authority to do so, was compelled to repudiate his own words upon the same subject.

Under our present competitive system, any decrease that is made in the number of workers, or any increase that is made in the number of capitalist masters who do not work, the better it is for the workers.

These activities will increase from time to time and the confidence and respect of the public will be won by the public finding out for themselves that the Socialist party is a live political institution even though it be out of office.

There have always been those who lack the stern qualities and the grim persistence to keep on fighting until the goal is reached.

At the time and quite apart from the general servitude involved in the wage system, the working class ought not to exaggerate to themselves the ultimate working of these every-day struggles.

At the time and quite apart from the general servitude involved in the wage system, the working class ought not to exaggerate to themselves the ultimate working of these every-day struggles.

It once so happened that there were ten men who were shipwrecked on a desert island. They were without sustenance, but before solving their problem they decided that they must have government.

White Slaves in America

From the Workers in America History, by James O'Neal, Terre Haute, Ind.

The American colonies were regarded as a convenient dumping ground for unfortunate so that between the years 1661 and 1668, various proposals were made to the king and council to constitute an office for transporting to the plantations all vagrants, rogues and idle persons that could give no account of themselves.

There were several classes of these slaves and perhaps the best general description of their servitude is given by the historian, McMaster. After describing the status of the black slaves he says:

"One step above the slaves were the convict bond-servants, or men and women in a state of temporary involuntary servitude. These people were either political offenders or felon convicts.

The felons formed the great source of supply, and had been sent over in very considerable numbers from the earliest days of colonization.

Stories from History

Upurpation of the Courts. Allan L. Benson in Pearson's Magazine, August, 1911.

Nowhere in the constitution of the United States is the federal supreme court authorized to declare an act of congress unconstitutional.

When it was proposed in the constitutional convention of 1787, to give the federal supreme court even a limited veto upon congress, the convention, not once, but four times, refused to do so.

The power to declare acts of congress unconstitutional was usurped on behalf of the supreme court by Chief Justice John Marshall, who, in order to read into the constitution his authority to do so, was compelled to repudiate his own words upon the same subject.
