By CHARLES WITTER. WASHINGTON. -- Conclusive evidence that the entire military and imperialist caste in the United States is throwing its full strength behind the effort to mobilize the war and military machinery of this country on September 12 under the name of "Defense Day Test" is given in a letter of Mrs, Anthony Wayne Cook, president-general of the plutocratic Daughters of the American Revolution, addressed to the War Department. The letter declares that Mrs. Cook

# Prepare for International Youth Day

CEPTEMBER 7 is the day of the revolutionary young workers all over the world.

September 7 is International Youth Day! Under the leadership of the Young Workers League of America in this utuntry, and of the Young Communist International all over the world, the class corrections young workers will gather to demonstrate their strength and protest against capitalist

exploitation and imperialist wars. In this country the unemployment situation has brought great miseries to the workers. The young workers have been as usual the first ones to suffer by being thrown out of work, or else by being used to lower the wages of the adults.

The child labor amendment, which is supposed to end forever the exploitation of the children of the working class in America, has been exposed by us as a monstrous fraud that is being perpetrated upon the toilers.

On top of all the slavery and misery of the workers of this country, the imperialists—the capitalists and bankers— are making preparations to fling the flower of the working youth into a war for profits which will be more bloody than the last "war to end all wars." Already, all efforts are being made to mobilize the war strength of America, to foster a militarist spirit in the minds of the working class of this country. Defense Day, September 12, is the opening shot of the capitalists behind the government in preparation for war.

Against unemployment we raise the demand for "Work or maintenance by the government and industry at full union rates of wages wih vocational training under

Against capitalist imperialist mobilization day we call upon the young workers to demonstrate on International Youth Day for the class war to end all wars. Down with capitalist exploitation and wars for capitalist profits! Down with capitalist Defense Days!

Rally to the standards of Communism on International Youth Day! Long live the proletarian revolution!

Visions of a return of the huge war profits which left the people of the world permanently in debt to the great steel magnates are dancing in the heads of members of the Iron and Steel institute... # YOUNG REDS IN LEAD OF MOVE ON MUSSOLINI

### Rome Workers Showing Their Power

ROME. - Led by military squadrons consisting of members of the Young Communist League of Italy, tens of thousands of workers demonstrated on the streets of Rome against the Mussolini dictatorship and his black-shirted Fascisti. For the first time in three years, the workers marched the streets of the Italian capital with rec flags flying to the breezes and singing revolutionary songs.

Soldiers Boared The National Militia and the Fascist treeps fied in terror before the advancing marson, fearing that they were armed and would take revenge for the bloody list of wrongs that had been heaped upon them during the black reign of Mussolini. The caribineers, however, joined hands with the workers and did nothing at all to hinder their progress.

The marching masses moved towards the governmental buildings, where they shouted, "Down with Mussiph! Down with Fascism!"

# Join the Party in Building Councils of the Unemployed

THE WORKERS PARTY OF AMERICA has issued instructions to its lower units requesting them to begin the organization of the unemployed workers of this country wherever the situation requires it.

This will be the case in such centers where unemployment has reached a critical stage, as in the mining, textile, automobile and other industries. In such places the Workers Party will take the initiative in the formation of councils of the unemployed which will co-operate with the trade unions and other working class organizations.

In this campaign to organize the unemployed workers, it is imperative that all units of the Young Workers League should co-operate to the fullest extent and in closeat harmony with the party organization. A concerted drive must be made to organize the unemployed workers, both young and old, in order to prevent them from becoming scabs on the employed workers, and to unite their strength so that they can effectively demand the support of the government and industries, or work.

Our slogans in this campaign are "Work or Mainte-nance!" Unless the unemployed workers are organized into a solid group, they will present a growing menace to those workers who still have jobs. It is in times of unemployment that the bosses seek to take advantage of the millions of the jobless to cut the wages and increase the number of hours of those who are at work. And if the workers who are employed protest this slimy trick by going out on strike there are thousands of others who are ready to take their jobs away from them.

Such a condition must not be tolerated by the workers of this country. The interests of the workers, whether or not they have a job at the moment, are identical and they must present a united front against their common enemy, the capitalist class. We must not permit the boss class to

divide us in any manner.

The capitalist system is responsible for the lack of work at the present time just as it is responsible for unemployment at other times, as it is for war and child labor. The workers do not get the full value of what they produce and the time soon comes when they cannot buy back that which they have produced. They are then thrown out of work. That is the case today in America and in other countries of the world. The workers have made too much commodities, have manufactured too much profits for their fat bosses and that is why they go without jobs today

Because the bosses have made millions of dollars out of the sweat and toil of the workers, the Communists demand that they now disgorge some of the profits and use them to support the workers—or else furnish them with jobs. If they cannot do it they have admitted that their system of society cannot afford to support the majority of the people. Where plants close down we demand their re-opening under workers' control and management,

The young workers stand in a separate place to a certain extent. During the time of great unemployment, thousands of the youth are either thrown out of work or else taken back in order to help cut down the wages of the adult workers who remain in the shops. This situation must not be allowed to continue. It is up to the Young Workers League to organize the unemployed young workers into the Councils of the Unemployed so that they may be side by side in the struggle against the bosses.

For the youth we raise our special demands in the case

of unemployment. We demand the abolition of child labor.

We stand for vocational training of the youth during unemployment at the expense of the state and industry, which must also maintain them in the necessities of life, at trade union rates of wages.

We demand the organization of the youth into the trade unions so that they shall not be used as scabs and be able to work side by side with the adult workers for the betterment of the conditions of the entire working class. Join with the Workers Party of America for the organi-

zation and relief of the unemployed masses of America! Organize the young workers who are unemployed for the demands of the Young Workers League of Americal Work or Maintenance!

# ONE-LEGGED VICTIM OF LAST IMPERIALIST WAR GETS NINETY DAYS IN JAIL AS DRUG ADDICT

SAN FRANCISCO.—Seven years age, when the United States called for men to make the world safe for democracy, James Buero responded... He was a hale and husky youth. A shell took his left leg off at Belleau Wood, and in the months in hospitals afterwards he was given morphine to relieve the poin until at his discharge he was a fully developed dope addict... No attempt was made to cure him.

New Buero, with his crutches, is in the San Francisco jali for 90 days, ent Youth International, compare this comrades, the meaning of the rewith your congress, with the mighty minder of Comrade Lenin, which was with 18. In Germany things went so habit. This means simply suffering the tertures of hell without drugs, and habit. This means simply suffering the tertures of hell without drugs, and then being thrown out "eured," with \$45 a menth from the government and one leg. Every branch of the Young Workers League will hold its International Youth Day demonstration this year.

In order to have a successful celebration and to put across our message it is imperative that we distribute as much of our written propaganda as we possibly can.

Thousands of outside young workers will attend our meetings and we must sell as much literature as we possibly can. Is your branch going to take an extra hundle order of The Young Worker's special International Youth Day edition? It will contain special articles on the situation of the youth in America, the purpose of International Youth Day and stories on many other interesting subjects. It will be popularly written and we expect to sell as many of them as possible.

Fill out the blank order below and send in for your Worker.

And this main argument constitutes precisely the fundamental mistake of all advocates of disarmament. Socialists cannot be opposed to every war without cassing to be socialists.

Socialists have never been opposed to revolutionary wars, and they never can accept that attitude. Civil wars are also wars. Those who accept the place struggle must accept civil wars, which, under certain circumstances are a natural and inevitable continuance development and accentuation of the class struggle in every society based on class divisions. To deny or to overlook civil wars would mean becoming a victim of the most hopeless opportunism and abandoning the social revolution.

# Together for the Drive

DUE to a demand upon the part of the New York League, the Chicago League and many other league branches in different parts of the country, it has been decided to continue the subscription drive to Sept. 15th. Many of the leagues have collected subs. but have not turned them into the National Office. This is an incorrect method of procedure, and causes a great deal of confusion. All branches should send in all subs taken into the National Office AT ONCE. As fast as you get the subs, send them in. The most important thing is to prevent delay. The quota for the leagues and the amount of subs they have turned in is as follows:

It has been given recognition thru its demon stration of ability to accomplish tasks in its field and in many instances the aid it rendered the

party. It might be well to correct an un healthy tendency on the part of the party membership in some sections. to think of the league as an organization based on the mechanical difference in age. No! It has special demands and problems peculiar to itself and therefore must be thought of accordingly. The writer does not desire to deal with this matter but wishes to mention in passing as it is directly related to

the rest of this article. At the last international convention of the United Mine Workers of America, we saw comrades of the league, such as Pat Toohey and others, contribute their share in the work of cleaning out the reactionary Lewis machine. At the mine workers' convention of District No. 12 (state of illinola), four to five delegates to that conference were members of the Young Workers League. Altho these comrades did not play any conspicuous role yet the experience they received there. laid the basis for their future role is furnishing leadership to the pregreative element within the miners. In the party campaigns we have seen the league play its share at the various conventions as well as deing the technical work. Never in the history of the radical movement In this country did so many young neople take part to such an active measure. In the class struggle, Many old workers are surprised when seeing young comrades speaking on soan boxes at the street meetings, organizing and performing other functions. Last but not least the support being given to the Dally Worker cannot be underestimated.

The league has taken the initiative in many instances. In the shop nuclei work, it will be able to give much help to the party. The in-auguration of the factory campaigne has set an example to the party membership. The publicity that the feague is receiving in something more than cheap publicity. It is a reflex of activity, it has dis-missed from the most skeptical minds its privilege to exist. It has been an upward alimb and we can safely say now that it has everoome the most serious obstacles. The scope of activity of the Young Workers League has been wide and it has reached out and exploited the field of work to its fullest extent. We can speak of our movement proudly. We have as yet much to do in order to firmly establish our selves within the realms of sonfidence. Let us set to our work with a new impetus and continue tewards a mass organization.

# Unemployment Increases

EVERY report, whether capitalist or labor, indicates branches that unemployment in this country is steadily on the growth. increase. Thousands of workers are finding themselves without work, wandering the streets every day in the hopeless hunt for a master. Thousands of workers are using up what little savings they may have laid by in achieved aorder to tide themselves over what they consider a tem porary depression.

But this depression is far from temporary. From all signs it promises to be one of the bitterest unemployment periods that any country in the world has yet experienced. Already men are walking the streets hungry and homeless. Already they are beginning to feel the pinch of starvation.

What shall the workers do about it? In the face of the closing down of factories every day, the workers must organize themselves solidly, employed and unemployed to take care of the common interests of the entire
